

• no finding of deliberate indifference

• testing →

- intake testing

- exit testing

- testing (close testing)

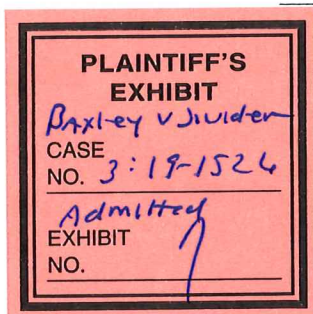

3-7 days  
of known positive  
on Q Dec 11/12

→ day 5

test again @ 12

2 tests while

immediate testing @  
symp.

## Intake Quarantine

test on take  
quarantine  
no further test unless symptomatic

→ Kenya has national quarantine two months  
broad based testing

mask - 2 masks on entry  
masks replaced on request

cleaning supplies every day

Vaccine →

more affirmative actions / materials  
education. ASK @ 2 mos  
broad-based  
have conversations  
medical vendors

Enforcement

← data on testing #s by  
reason for testing  
intake

51

→ Quarantine / Close contact  
Symptomatic  
Release / transfer  
broad based

data on quarantine →

length of stay

confirm locked in cell

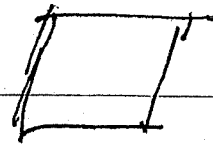

by all  
date -  
movement  
M

Medical isolation →

- ID in facility where happening
- can tell by data already gathered

w/ housing assignment  
movement records.

---

Testing

weekly if potential

12 OK →

↳ quarantine

2x

1-2 days prior

exposure

tested as soon as possible

quarantine → w/ same potential exposure

test 1, test day 7, test 14

Quarantine

Weekly update on # of masks

---

Data on isolation + quarantine

- When planning on housing  
weekly info on actual housing  
+ # of positive case
- When planning on quarantine

---

Intake Quarantine → less intensive
